

R.A.A.S express

www.aviationintertec.com

the highest value with the lowest total cost of ownership

RAAS Express is an aviation maintenance and inventory management solution designed for smaller operators, MROs and CAMOs. Based on the same platform as the industry-leading RAAS Maintenance & Engineering product suite, RAAS Express customers have the opportunity to gain the advantage of a very sophisticated set of features at a fraction of the regular price.

Feature for feature RAAS Express is the highest value system available with the lowest total cost of ownership. RAAS Express is one of the only fully web-browser-based maintenance and inventory management solutions where all functions can be accessed across the Internet. Modern technologies combined with a wide array of advanced fleet and inventory management features guarantee time and money savings plus increased capacity within your operation.

RAAS Express is available as a one-time license purchase or on a monthly access fee basis with no initial fee. System hosting, which allows you to outsource IT management and support of RAAS Express, is available as well and makes system management effortless.
